Gulf Stream Exclusive Features & Benefits

**SOLID
HARDWOOD
CABINETRY**

**PREDRILLED
HARDWOOD
CONSTRUCTION**

Our residential style cabinets are constructed of solid hardwood doors and fronts that are predrilled and screwed then they are stained and top coated with a furniture grade finish that provides long lasting beauty and durability as well as adding strength and quietness to your motorhome.

COMPETITOR'S CABINETRY

Other companies use wrapped cabinet fronts prone to peeling, fading and tearing. The softer composite wood used does not hold screws as well as hardwood resulting in loss of strength and squeaking. Discoloration will degrade the beauty and lower the value of the motorhome.

**GALVANIZED
STEEL
STORAGE
COMPARTMENTS**

Seamless, carpeted, galvanized steel storage compartments safely cradle your valuables. Rust protective paint and foam sealed for extended life and a quiet ride.

**E-Z STORE
PRIVACY**

**NO MORE BUTTONS
NO MORE HASSLE
NO MORE WASTED SPACE**

Unique self storing privacy divider featuring quick and simple setup.

Dual metal H-Ducted air conditioning system with foil bubble wrapped insulation for improved climate control.

Excellent Weathering - Maintaining the vehicle's quality appearance enhances its resale value.

Tear Resistance - Unlike rubber roofing, Flexroofs hard abuse resistant finish resists tearing, a condition that can cause leaks and lead to expensive repair

Low Maintenance - Road grime can easily be removed with normal cleaning maintenance. Rubber chalking due to solar breakdown of the roof surface is eliminated, preserving the original appearance and resale value of the vehicle.

Stain Resistance - Fiberglass Flexroof is designed to resist staining and maintain its quality appearance.

Structural Integrity - Unlike conventional EPDM rubber roof membranes, Flexroof is a structural component of the roof system.

Textured Fiberglass - Helps dissipate heat and prevents tree limbs from tearing or scratching your roof.

**Seamless
FIBERGLASS ROOF**

SUPER STRENGTH TRUSS SYSTEM

**TUFFTRUSS
6000lbs!**

Unlike traditional plywood and foam seating Comfort Plus Seating features the strength of steel and the comfort of a sprung dinette cushion.

6" C CHANNEL EXTENSION

The super strength truss system is unmatched in the class C industry. The structural subfloor foundation begins by welding a network of integrated steel trusses to the chassis rail. Specifically designed to distribute and transfer the tremendous forces from the coach to the chassis rail these trusses are individually tested to withstand 6,000 pounds each.

When the chassis is stretched, Gulf Stream stands alone in the industry by using a full 6" C channel extension versus the traditional 4" or less. This practice adds to the strength of the foundation and offers peace of mind that towing is safe on an extension that is true to the chassis.
