

AMERICAN COACH 2007

*M*ajestic. Grand. Awe-inspiring.
(And the mountains are nice, too.)

THE OFFICIAL LUXURY COACH

American
HERITAGE®

OF THE AMERICAN ROAD.

While it may not
be one of the seven
wonders of the
world, it's definitely
enough to make
some jaws drop.

American Heritage shown in Motion Graphics with custom colors.

American Heritage shown in custom White Chocolate interior decor with High Gloss Cherry wood cabinetry. Entertainment Center includes a Sony® 40" LCD TV and Bose® Lifestyle® Home Theater System.

*T*HE VIEW IS SPECTACULAR.
FROM THE REAR TO
THE FRONT, THAT IS.

If this picture makes your heart beat a little faster, just think how it would feel to own one of the select few American Heritage coaches produced each year. Situated at the very pinnacle of luxury, there's no trade-up from here. As you can see, the scenery at the top is pretty darn good.

Y
OU HAVEN'T HEARD
YOUR FRIENDS "OOH"
AND "AAH" THIS MUCH
SINCE THE 4TH OF JULY.

Socializing is one of life's great joys, made even sweeter when guests are slack-jawed with wonder. You're sure to host many a get-together, laughing with friends old and new. In a sumptuous setting like this – with its extreme high-def electronics and illuminated wine rack – it's pretty hard not to have a good time.

GLOSSY, REAL
GRANITE. RICHL
GRAINED WOOD. THIS
GALLEY IS LIKE A
SHOWCASE FOR
MOTHER NATURE.

Who says you can't enjoy nature indoors? Like the genuine granite slab

countertops, engineered to be 70% lighter. Or the stunning wood

molding, trim and cabinetry with its exclusive marine-

style hardware. The designer appliances only add

to the beautiful scenery. As a side note, it's a great place for cooking.

A NICKEL SAYS WE'VE GOT THE SMOOTHEST RIDE.

Our exclusive Liberty Chassis makes American Coach the best riding luxury coach line. In fact, we placed a nickel, on end, on one of the frame rails while the engine was running – and the nickel did not topple.

That's how little vibration was created.

The secret is the strong, rigid frame that strengthens the integrity of the driving platform. Complemented by a high-performance diesel engine, it creates an extremely smooth driving experience. It's been confirmed by President Jefferson himself.

Electro-Coated Structure protects against corrosion – in fact, it passed a rigorous 1,000-hour salt spray test.

All Steel Structure minimizes flex and contributes to a lower center of gravity that enhances the driving experience.

Huge 15,000 lbs. Towing Capacity
easily tows your favorite vehicle.

Automatic Traction Control (ATC)
improves traction if the coach is on a slippery surface.

Laminated
Storage Liners
are made of a durable,
fiberglass-reinforced plastic
to stay clean and neat.

55-Degree Turning Angle
allows you to turn more sharply.

Independent
Front Suspension
handles those uneven road
surfaces smoothly.

The Driver's Area includes the finest technology including a
Visteon® six-CD player and AM/FM radio, and a Garmin® Navigation System.

CALLING IT
"COMFORTABLE" IS
LIKE CALLING THE
TETONS "BIG."

The bedroom suite is fabulously plush and well-equipped, from the acres of cushy mattress to the cutting-edge, high-def entertainment system. When you wake up, you may need to

remind yourself that you haven't
died and gone to heaven.

The bedroom entertainment center includes a Sony® 32" LCD TV (available Sony® 40" LCD TV) and a Bose® 3-2-1 Home Theater System.

*T*HE PEAK OF
INDULGENCE.

Start your day on a high point in this grand bathroom, with its curved glass shower and hand-laid wallpaper. Bathrooms simply don't get any more deluxe.

EXTERIOR GRAPHICS*

The head-turning exterior is heightened by full-body paint and window silks that make the windows virtually disappear into the paint. Available with three different graphic schemes, the window silks provide privacy and a view of the outside world at the same time.

- GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this fully loaded motor home. The GVWR is equal to or greater than the sum of the (UVW) unloaded vehicle weight plus the (CCC) cargo carrying capacity*.
- GAWR (Gross Axle Weight Rating) is the maximum permissible loaded weight a specific axle is designed to carry.
- Base Weight is the estimated weight of the motor home without fuel, options, water, cargo or passengers.
- GCWR (Gross Combined Weight Rating) is the value specified by the motor home manufacturer as the maximum allowable loaded weight of this motor home with its towed vehicle. Towing and braking capacities may be different. Refer to American Coach and chassis manufacturer's manuals for complete information.
- Length taken from front bumper to rear bumper (excludes accessories).
- Excludes safety equipment and awnings.
- Motor homes feature a body-width over 96" which will restrict your access to certain roads. Before purchasing, you should research any state and/or province road laws which may affect your usage.
- Tank manufacturer's listed water capacity (WC). Actual propane capacity is 80% of water listing as required by the safety code.

*UVW and CCC are found on the cargo carrying capacity label in each RV.

† The chassis manufacturer recommends the installation of a supplemental brake control system to activate the brakes on the vehicle or trailer you are towing. Hitch receiver ratings expressed are maximum for the hitch receiver installed and may require the purchase of additional equipment that is dependant on the weight of the towed load. Consult with hitch receiver manufacturer for further information.

IMPORTANT — PLEASE READ: Product information, photography and illustrations included in this publication were as accurate as possible at the time of printing. For further product information and changes, please visit our website at www.AmericanCoach.com or contact your local American Coach dealer. Prices, materials, design and specifications are subject to change without notice. All weights, fuel, liquid capacities and dimensions are approximate. American Coach has designed its recreational vehicles to provide a variety of uses for its customers. Each vehicle features optimal seating, sleeping, storage and fluid capacities. The user is responsible for selecting the proper combination of loads (i.e. occupants, equipment, fluids, cargo, etc.) to ensure that the vehicle's capacities are not exceeded.
