

GET BEHIND THE WHEEL OF A WINNEBAGO FAVORITE.

In fact, the Minnie is the industry's best-selling Class C motor home, a trend the 2005 Minnie promises to continue. With a list of innovative standard features and numerous floorplans to fit your lifestyle, the Minnie delivers an unparalleled level of value. With the RV Radio,* Stitchcraft furniture, front entertainment center with 24* stereo TV available on most models and available two-way radios, the Minnie delivers where other motor homes fall short. Add to that the Smart Space™ design elements that make the most of interior living space and you'll see why it's virtually impossible to find another motor home with this much to offer.

BRING IT WITH YOU.

The comforts of home are never far away in the Minnie. It comes equipped with thermostat-controlled, ceiling-ducted air conditioning and an available roof air heat pump to take the chill out without firing up the furnace. The plush Stitchcraft furniture and stylish Portsmouth Oak cabinets make you feel right at home on the road. And thanks to features such as day/night pleated shades in the lounge, dinette and bedroom, as well as wall-mounted light switches, it's easy to control the amount of light, no matter what time of day. Even the easy-to-clean no-wax vinyl flooring is designed to make your life hassle-free.

Every Minnie is outfitted with additional seat belts, providing you with greater seating flexibility while traveling. A child seat tether is located in the forward-facing dinette seat.

ENTERTAINMENT, ANYWHERE.

To keep you entertained, most models have an available front entertainment center with 24" TV and a DVD/VCR combo. Or upgrade to the Home Theater Sound System that includes a receiver, amplifier, DVD/VCR player, five recessed speakers and a subwoofer for your listening enjoyment. An available 300-watt inverter provides 110-volt power, allowing you to enjoy your entertainment even when shoreline or generator power is not available. All Minnie models are also digital satellite-system ready.

The bedroom on the 29B features a queen-size bed with plenty of underbed storage. Additional storage can be found in the deep overhead cabinets and spacious wardrobe. You'll also enjoy the vanity area complete with tip-up mirror, it doubles as a convenient place to write letters or type on a laptop computer.

KEEP THE COOK HAPPY.

Prepare meals on the go using the three-burner Magic Chef* range/oven with built-in microwave and vented hood range with light (most models). The double-bowl sink with sink cover provides additional countertop space. Several models also feature a flip-up countertop extension for even more work space. And when it's time to clean up, there's no shortage of storage space. The available water filtration system provides filtered water to the cold-water galley faucet.

YOU'RE IN THE DRIVER'S SEAT.

Once behind the wheel, you'll notice that the controls, switches and gauges are all sized and positioned for easy operation. Convenient features such as power windows and door locks are well placed for easy access. Enjoy the added comfort and security of standard keyless entry remotes that lock and unlock the driver and passenger doors.

Our exclusive Trimline™ center console is another example of the Smart Design™ that goes into each Winnebago Industries motor home. The sleek, innovative design provides more legroom between the driver and passenger seats, and makes for an easier entrance to the living area from the cab area.

A) The available LCD rearview monitor is conveniently located in the driver's sun visor.

B) Our engineers worked closely with the manufacturer to create the RV Radio specifically for RV use. It includes an AM/FM stereo cassette/CD player with a built-in weather band for immediate weather updates at the touch of a button. Its large control knobs and buttons are easy to operate. Or simply use the radio remote, conveniently located on your steering wheel, new for 2005. A hand-held remote also makes operating the radio even easier when you are parked.

C) You'll be treated to the high-back, fixed lumbar support of custom seating with a multi-adjustable recline mechanism. For added luxury, cab seats are available in leather

D

G

MODERN CONVENIENCES ABOUND.

A) Leave nothing behind, thanks to the spacious rear storage area with wire shelves and hooks on the 26A. This Smart Storage™ area is large enough to hold a step ladder.

- B) Save your back with the help of a Winnebago Industries original, the StoreMore® slideout system. Because the large storage compartments extend with the slideroom, you no longer have to crawl under the slideout to load and unload your belongings. This premium slideout system is featured on the 31C and 32G.
- C) The convenient exterior wash station helps keep the dirt and grime where it belongs—outside.
- D) There's no shortage of entertainment options, even when you're outdoors. The available exterior entertainment center features an AM/FM stereo, remote control CD player, 12-volt DC receptacle, TV jack, 110-volt outlet, speakers and removable table. And you can keep it all secure behind its lockable compartment door.
- E) Check LP gas, battery power and other vital motor home functions from the centrally located monitor panel.
- F) Tow up to 5,000 pounds of fun using the standard hitch, with 350 pounds of vertical tongue weight.
- G) Winnebago Industries' exclusive TrueLevel™ holding tank monitoring system incorporates Mirus™ detector cells to ensure accurate fresh and wastewater tank level readings. Mirus detector cells produce a microelectric field that detects liquid levels from outside the tank. No more probes to corrode or clog. Just true, accurate readings time after time.
- H) Enjoy all your favorite channels anywhere with the available digital satellite dish. Prewiring for the dish and elevation sensor come standard. (Digital satellite reception requires a satellite receiver and subscription.)
- I) Stay connected with the available two-way radios. The four handsets have up to a five-mile range and recharge from the coach's house batteries at their built-in charging station.

NO MATTER WHAT YOU'RE LOOKING FOR IN A MOTOR HOME, THE MINNIE HAS A FLOORPLAN TO FIT YOUR LIFE.

EXTERIORS INTERIORS

Autumn Maple Metallic

Standard Graphics

Deluxe Graphics

BUILT TO STAND UP TO WHATEVER YOU ENCOUNTER.

Better construction leads to a better motor home. Our one-piece fiberglass sidewall makes the Minnie incredibly resilient to the elements. The available dual-glazed, thermo-insulated windows provide additional comfort in any weather. Choose the available deluxe graphics package for an even more upscale look. It includes fiberglass running boards and lower valance paint.

We believe the same high standards we apply to construction should apply to interior design. That's why we design efficient floorplans based on customer input, why we look for durable fabrics in pleasing colors, and why we handcraft our own cabinets using traditional panel and rail construction.

Winnebago Industries' continuing program of product improvement makes specifications, equipment, model availability and prices subject to change without notice. Comparisons to other motor homes are based on the most recent information available.

NOT ALL MOTOR HOMES ARE CREATED EQUAL. As you take a closer look, you'll see that there is much more to the Winnebago Minnie than a long list of standard features and compelling floorplans. Beneath it all you'll find a SuperStructure® foundation of strength and durability, and Winnebago Industries' recognized service and warranty support.

WE ARE COMMITTED TO SERVICE. We back our motor homes with the best after-the-sale service in the industry. This includes a 12-month/ 15,000-mile basic limited warranty; 36-month/36,000-mile warranty on structure; standard 10-year limited parts-and-labor roof skin warranty; and complimentary 24-hour Roadside Assistance Program. TripSaver Fast Track Parts guarantees that in-stock warranty parts ship directly to your dealer within 24 hours. Winnebago Industries has a nationwide dealer service network.

CERTIFIED QUALITY. Recreation Vehicle Dealer Association members annually rate RV manufacturers on the quality of their products, and on their sales and service support. Winnebago Industries has achieved the coveted Quality Circle Award every year since its inception, the only RV manufacturer to do so.

WARNING: JOINING WIT HAS BEEN KNOWN TO CAUSE EXCESSIVE FUN. Winnebago-Itasca Travelers (WIT) is a club for owners of Winnebago Industries motor homes. WIT is a great way to meet people and offers you caravans and rallies, local and state group activities, and other benefits for RVers.

SUPERSTRUCTURE is the term given to Winnebago Industries' structural motor home design and construction. Rather than a single component, it is the culmination of design integration that incorporates steel and aluminum substructures; welded tubular steel floor risers; interlocking joint technology; and Thermo-Panel® floor, roof and sidewalls to form a high-strength, durable vehicle body.

Thermo-Panel manufacturing combines a durable exterior panel with welded aluminum support substructures. The substructures are embedded in a high-density, block-foam insulation core to create a strong, durable, yet lightweight sidewall. Just another Winnebago Industries' invention.

- A Interlocking joint construction utilizes advanced extruded aluminum structural components to create integrated floor-to-sidewall and sidewall-to-roof joints. This design effectively distributes the weight of the walls and roof, making a stronger and more durable body than competitor designs that rely on screws to carry the weight.
- **B** The foundation substructure assembly is precision-aligned to maximize strength and cross-coach support as well as durability.
- C Tubular steel risers feature a truss-design core for superior strength and provide a stable base for the floor structure and storage compartments.
- D Critical steel components are treated using an advanced electrodeposition coating process that provides superior corrosion protection.

Seat belts are your most important hookup. Always buckle up.

One-year-old competitor's rubber roof

One-year-old Winnebago Industries fiberglass roof

BUILT TO A HIGHER STANDARD.

The Minnie features a crowned, one-piece fiberglass roof skin backed with a 10-year limited parts-and-labor roof skin warranty. Fiberglass offers superior strength, attractiveness and durability compared to rubber roofs found on many competitive models. Over time, rubber roofs are susceptible to chalking, streaking and degradation, and have less puncture and tear resistance than fiberglass.
